

HOME CLEANING KIT

COMPLETE HOME CLEANING KIT

User guide

DESCRIPTION:

The HOME CLEANING KIT is a cleaning system composed of specific products designed for both daily and intensive home cleaning, developed to tackle different types of dirt such as limescale, grease, streaks, mould, organic residues and stubborn household dirt. It is suitable for use on sanitary ware, taps, shower enclosures, food-contact surfaces, glass, mirrors, stainless steel, ceramic coverings, washable surfaces and upholstery fabrics, both in domestic environments and in professional settings on compatible surfaces. The combined action of degreasing cleaners, limescale removers, glass cleaners, fabric detergents and specific products for organic dirt and combustion residues, together with dedicated technical accessories, allows targeted cleaning depending on the type of surface being treated. This approach helps improve the overall effectiveness of cleaning operations and, over time, contributes to maintaining cleaner, more hygienic surfaces that are easier to maintain.

FIELDS OF APPLICATION:

Suitable for daily and intensive cleaning of the main household surfaces exposed to limescale, grease, streaks, mould and organic dirt, including:

- sanitary ware, sinks and taps
- shower enclosures, shower glass and ceramic wall coverings
- walls and surfaces affected by mould and dark stains
- worktops and food-contact surfaces
- tables, refrigerators and washable kitchen surfaces
- glass, mirrors and shiny surfaces
- stainless steel and plastic laminate surfaces
- kitchen ovens, barbecues and fireplace glass
- pots and baking dishes with grease residues or soot
- sofas, rugs, carpets and car upholstery
- eco-leather surfaces

Do not use limescale removers on:

- marble
- travertine
- slate
- materials not resistant to acidic substances

Do not use degreasing cleaners on:

- microwave ovens
- mini ovens
- unpainted or non-enameled aluminium surfaces

CHARACTERISTICS:

The HOME CLEANING KIT is a cleaning system designed for the effective cleaning of the main household surfaces exposed to limescale, grease, streaks, mould, organic dirt and carbon residues. The combined action of the products allows you to manage both daily cleaning and more targeted cleaning tasks progressively, depending on the surface and the type of dirt present.

In particular:

- PULI ECO performs a degreasing action on food-contact surfaces such as worktops, tables, refrigerators and shelves, helping remove greasy residues without contaminating the treated surfaces;
- PULIMUFFE® is suitable for hygienic cleaning of walls, plaster, coverings and shower enclosures,

- helping remove mould and dark stains caused by organic residues;
- SHOWER BRILL supports the routine maintenance of surfaces frequently exposed to water such as ceramic, stainless steel, chrome finishes, glass and plastic laminates;
- SANI-KAL BIO acts on limescale deposits and mineral residues found on ceramics, sanitary ware, taps, glass and stainless steel;
- VETRONET enables daily cleaning of glass, mirrors and shiny surfaces, helping remove streaks and light dirt;
- PULIFUMO® breaks down carbon residues, grease, soot and smoke deposits during routine cleaning of surfaces exposed to combustion such as kitchen ovens, barbecues, fireplace glass and baking dishes;
- PULI TEX is designed for cleaning and removing dirt and stains from upholstery fabrics such as sofas, carpets, rugs, car upholstery and eco-leather;
- the MAGIC SPONGE helps mechanically remove stubborn dirt from compatible surfaces;
- the STEEL-T CLEANING CLOTH | FILMOP allows cleaning and drying of shiny surfaces such as chrome steel, ceramic and glass;
- the EASYCLEAN SPONGES FOR SPECIFIC SURFACES help organise cleaning tasks in different areas of the home thanks to colour-coded variants with identifying pictograms.

INSTRUCTIONS FOR USE:

Use the products of the HOME CLEANING KIT according to the surface and the type of dirt.

- For food-contact surfaces such as worktops, tables, refrigerators and shelves: apply PULI ECO, rub if necessary and rinse.
- For walls, plaster, coverings and shower enclosures with mould or dark stains: apply PULIMUFFE® and proceed with cleaning as needed.
- For routine maintenance of ceramic, stainless steel, chrome finishes, glass and frequently wet surfaces: use SHOWER BRILL and finish the surface.
- For limescale deposits on sanitary ware, taps, glass and acid-resistant surfaces: apply SANI-KAL BIO, leave to act and rinse.
- For glass, mirrors and shiny surfaces: apply VETRONET and dry with the STEEL-T CLEANING CLOTH | FILMOP.
- For kitchen ovens, barbecues, fireplace glass, pots and baking dishes with grease residues, soot or smoke deposits: apply PULIFUMO®, then rub and rinse.
- For cleaning sofas, rugs, carpets, car upholstery and eco-leather: use PULI TEX according to the instructions indicated in the technical data sheets.
- For stubborn dirt on compatible surfaces: use the MAGIC SPONGE or the most suitable EASYCLEAN SPONGES FOR SPECIFIC SURFACES depending on the area of use.

Note. For detailed application methods, action times and compatible surfaces, consult the technical data sheets of the individual products.

PRECAUTIONS:

During the use of the products included in the HOME CLEANING KIT, it is recommended to wear protective gloves and avoid direct contact with skin and eyes.

Do not use limescale removers on:

- marble
- travertine
- slate
- materials not resistant to acidic substances

Do not use the mould remover on:

- wood, especially if unpainted
- absorbent materials treated with wax (e.g. terracotta)
- polished marble

Pay particular attention when using on:

- metal surfaces and fabrics, which must be protected from contact with the mould remover
- bathtubs made of methacrylate, which may become opaque when in contact with the mould remover
- painted surfaces or coloured plaster, where a preliminary test on a small area is always recommended

Note. For more detailed information, consult the technical data sheets of the individual products.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

Before purchasing the products, please **read the warnings and risks** on the respective product pages.
