

VIACEM®

STRONG BUFFERED ACID CLEANER FOR TERRACOTTA

User guide

DESCRIPTION:

Strong buffered acid detergent based on hydrochloric acid, corrosion inhibitors, anti-fumigant surfactants.

FIELDS OF APPLICATION:

Suitable for descaling cleaning of:

- terracotta
- terracotta tiles

CHARACTERISTICS:

VIACEM® is a strong buffered acid cleaner specifically formulated for descaling terracotta surfaces. In particular:

- removes efflorescence, cement deposits and paint residues during post-installation and post-construction descaling cleaning;
- is suitable for seasonal cleaning of outdoor terracotta floors affected by limescale deposits caused by weathering;
- releases fewer corrosive fumes than conventional muriatic acid;
- provides greater emulsifying power on solid dirt and a more controlled dissolving action.

INSTRUCTIONS FOR USE:

Before use, test the product on a small area to check the material's resistance to VIACEM®.

- Undiluted: for heavy, stubborn limescale deposits and for removing substantial cement slurry residues.
- Diluted with an equal part of water: for cleaning that requires normal descaling and limescale-removing action and for neutralising surfaces after previous alkaline cleaning.

How to use the product:

- Apply VIACEM® to the surface and, where possible, leave it to work for a few minutes.
- Scrub the surface with pads or brown plastic-fibre discs, or with nylon, Tynex or carborundum brushes, until the dirt and deposits have been removed.
- Repeat the cleaning process if necessary.
- Always rinse thoroughly with plenty of water.

PRECAUTIONS:

- Do not use on natural stone, terrazzo, concrete, cement-based agglomerates or materials that are not acid-resistant.
- Do not allow the product to pool or remain standing on the surface.
- Do not use in pressure washers.
- Protect metal surfaces and all materials sensitive to strong acids from contact with the product and its fumes.
- Before use, test the product on a small area to check the material's resistance.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNING: DANGER

Hazard statements: May be corrosive to metals. – Causes severe skin burns and eye damage. – May cause respiratory irritation.

Precautionary statements: Do not breathe dust / fume / gas / mist / vapours / spray. – Wear protective gloves/ protective clothing / eye protection / face protection. -IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower]. – IF INHALED: Remove person to fresh air and keep comfortable for breathing. -IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. – Store in a well-ventilated place. Keep container tightly closed.

Contains: Hydrochloric acid 31-33%

Ingredients in compliance with Regulation (EC) No. 648/2004:

Non-ionic surfactants < 5%, hydrochloric acid 10%<C<20%, perfume

UFI:Y500-X0VV-P00J-YTYT

Rev5-Ver190122

PACKAGING:

- 1 L PE bottle – boxes of 6
- 1 L bottle + BROWN BUFFER PAD
- 5 L PE jerrycan – boxes of 4
- 20 L PE jerrycan

YIELD:

Depending on the dirt to be removed and the absorption of the material:

- for energetic washings 1 lt / 3-6 m²;
- for normal washings 1 lt / 8-12 m².

TECHNICAL DATA:

- Physical state: green fluid.
- Specific gravity (g/cm³): 1,075
- pH (20°C) of the pure product: <1
- Flame point (ASTM): non-flammable.
- Solubility in water: soluble in water.

STORAGE:

Keep the product tightly closed at temperatures between 0 °C and +30 °C not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
