MICRONET®

INTENSIVE CLEANER FOR MICROPOROUS STONE MATERIALS

User guide

DESCRIPTION:

Concentrated alkaline detergent solution based on inorganic salts. It does not contain strong alkalis (caustic soda, potash, ammonia). Low foaming.

FIELDS OF APPLICATION:

For extraordinary cleaning and removal of trampling dirt, even the most stubborn, from microporous stone materials, such as: porcelain tiles, ceramic, klinker, stones and polished or honed agglomerates.

CHARACTERISTICS:

MICRONET is a concentrated detergent for the deep cleaning of microporous surfaces in porcelain tiles, ceramic, klinker, polished and honed stones, terrazzo.

MICRONET:

- quickly and deeply removes trampling dirt, even the most stubborn, from also low-absorption or non-absorbent materials with a high degree of roughness;
- is excellent for cleaning highly treadable or non-slip surfaces, where dirt from trampling penetrates into the porosity of the material, making it difficult to clean;
- is ideal for ordinary and extraordinary cleaning of external and internal microporous surfaces with persistent humidity (eg swimming pools, changing rooms, terraces), which creates dark stains that are difficult to remove;
- with ordinary use keeps the material and the joints clean;
- does not contain strong alkalis (caustic soda, potash, ammonia);
- has low foaming, is odorless and does not leave streaks;
- is easy to use manually;
- is ideal for use with scrubber-dryers, industrial and domestic floor washers, pressure washers.

INSTRUCTIONS FOR USE:

The concentration of use depends on the type of dirt to be removed:

Pure or diluted 1 part of MICRONET in 1 part of water: for the removal of stains and stubborn dirt.

- Pour the product on the stain or on the surface;
- Wait a few minutes and wipe with blue buffer or soft discs for monobrush;
- Remove the residue with wet vacuum or dry cloth;
- Finally rinse the surface with a diluted acid solution, to remove the residues (eg solution 2 – 5% of DELICACID).

Dilute 50cc – 100cc of MICRONET in 1 liter of water: for extraordinary washing of surfaces.

- Pour on the surface to be cleaned;
- Leave it act for a few minutes and wipe with blue buffers or blue discs for monobrush until the dirt is removed;
- Remove residue and dirt with wet vacuum or soft cloth and then rinse with water;
- On some materials (polished or smooth surfaces) it may be useful to clean again the surface with a clean damp cloth.

Dilute 10cc – 100cc of MICRONET in 1 liter of water: for the ordinary cleaning of highly trampled floors, with washer-dryer machine or microfiber cloth.

Do not use on surfaces treated with polymeric waxes.

PRECAUTIONS:

- do not use on surfaces treated with polymeric waxes.

NOTES:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests to the fields of use, to the types of materials present and to the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNINGS: ATTENTION

Hazard statements: Causes serious eye irritation.

Precautionary statements: Protect eyes / face. – If eye irritation persists, consult a doctor.

Ingredients compliant with Regulation (EC) No. 648/2004:
Phosphates 5%< C <15%, anionic surfactants<5%.

UFI: SK20-4070-800E-HD9M

Rev7-Ver080222

PACKAGING:

- 1 lt Plastic bottle box 6 pcs;
- 5 lt Plastic canister box 4 pcs.

YIELD:

- According to the concentrations of use.

TECHNICAL DATA:

- Physical state: colorless liquid.
- Specific weight (g / cm3): 1.095
- pH (20 ° C) of the pure product: 11
- Flash point (ASTM): not flammable
- Solubility in water: soluble in water.

STORAGE:

Keep the product tightly closed at temperatures between 0°C and + 30°C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
