

RED DISC | Low Abrasion

LOW ABRASION DISC FOR SINGLE DISC MACHINES AND SCRUBBER DRYERS

User guide

DESCRIPTION:

RED DISC is a low abrasion disc manufactured from high-density synthetic polyester fibres bonded with resin and abrasive mineral particles. Designed for use with single disc machines and scrubber dryers, it is ideal for deep cleaning, degreasing, spray cleaning and removing worn maintenance coatings from hard and resilient floors while delivering consistent and uniform mechanical cleaning performance.

FIELDS OF APPLICATION:

Ideal for:

- deep cleaning of hard and resilient floors;
- degreasing surfaces affected by stubborn dirt and greasy residues;
- removing worn maintenance coatings and surface residues;
- spray cleaning and routine floor maintenance;
- terracotta, quarry tiles, porcelain stoneware, marble, granite, natural stone and cement-based agglomerates;
- concrete, linoleum, PVC and rubber flooring;
- use with single disc machines and scrubber dryers.

CHARACTERISTICS:

RED DISC is a low abrasion synthetic fibre disc developed for deep cleaning and intensive floor maintenance. It:

- effectively removes stubborn dirt, surface build-up and persistent residues;
- helps remove worn and layered maintenance coatings;
- is ideal for degreasing and spray cleaning applications;
- prepares the floor for subsequent maintenance and protective treatments;
- delivers consistent cleaning performance without excessive abrasion;
- works best when used with the most suitable MARBEC detergent for the floor material.

Made from high-density synthetic polyester fibres with resin and abrasive mineral particles, it is resistant to acidic and alkaline detergents, washable and reusable, maintaining reliable performance over time.

INSTRUCTIONS FOR USE:

Fit the RED DISC onto a compatible single disc machine or scrubber dryer and use it with the most suitable MARBEC detergent according to the floor material and the type of dirt to be removed.

Recommended combinations include:

- UNIPUL® for deep cleaning and degreasing terracotta, natural stone, porcelain stoneware, concrete and wood floors;
- ECOMARBEC for deep cleaning terracotta, natural stone and stone-based surfaces;
- DELICACID® for post-installation cleaning and removing cement residues from acid-resistant surfaces;
- METAL STRIP for removing maintenance coatings and metallised finishes;
- STRIP RESIL for stripping and intensive cleaning of resilient flooring;
- PULIBRILL® for deep cleaning wood and parquet floors.

After use, rinse the disc thoroughly with clean water, allow it to dry completely and store it in a dry place.

PRECAUTIONS:

- Use RED DISC only on compatible floor surfaces and always select the appropriate MARBEC detergent for the material being cleaned.
- Before use on delicate or high-value surfaces, carry out a preliminary test in an inconspicuous area.
- Do not use the disc on floors that require non-abrasive cleaning accessories.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the

types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

PACKAGING:

- Single disc – pack of 1 (available in 330 mm or 432 mm)

YIELD:

Approximately 25–70 m² (270–750 sq ft) per disc, depending on the roughness of the floor surface.

TECHNICAL DATA:

- Material: High-density synthetic polyester fibres with resin and abrasive mineral particles.
- Colour: Red.
- Abrasion level: Low.
- Chemical resistance: Resistant to acidic and alkaline detergents.
- Washable: Yes.
- Reusable: Yes.
- Available diameters: 330 mm (13?) and 432 mm (17?).
- Compatible with: Single disc machines and scrubber dryers.

STORAGE:

Store in a clean, dry place away from moisture and direct heat sources. After use, wash the disc thoroughly, allow it to dry completely and store it flat to preserve its performance and service life.
