

BLUE DISC | Light Abrasion

LIGHT ABRASION DISC FOR SINGLE-DISC MACHINES AND SCRUBBER DRYERS

User guide

DESCRIPTION:

BLUE DISC is a light abrasion synthetic fibre disc for single-disc machines and scrubber dryers, specifically designed for intensive cleaning, degreasing, partial wax removal and spray cleaning of hard floor surfaces.

FIELDS OF APPLICATION:

The BLUE DISC is recommended for intensive cleaning, degreasing, partial wax removal and spray cleaning on hard floor surfaces.

It is ideal for:

- porcelain tiles;
- terracotta and quarry tiles;
- natural stone, marble and granite;
- cement-based agglomerates;
- linoleum, PVC and rubber;
- wood and parquet.

CHARACTERISTICS:

The BLUE DISC provides a light abrasive action that removes stubborn dirt, surface build-up and the upper layers of worn maintenance wax, preparing the floor for subsequent treatments or finish restoration.

It allows you to:

- carry out intensive cleaning and degreasing operations;
- perform partial wax removal on treated floors;
- remove surface build-up and maintenance residues;
- carry out spray cleaning operations;
- clean stone, resilient and wooden floors using the most suitable MARBEC detergent.

INSTRUCTIONS FOR USE:

Fit the BLUE DISC to a compatible single-disc machine or scrubber dryer and pair it with the most suitable MARBEC detergent according to the floor material and the type of dirt to be removed.

Recommended combinations include:

- POWER DET® for post-installation cleaning and intensive cleaning of porcelain tiles;
- UNIPUL® for intensive cleaning, degreasing and partial wax removal on terracotta, natural stone, porcelain tiles, concrete and wooden floors;
- ECOMARBEC for intensive cleaning of terracotta, quarry tiles, natural stone and other stone surfaces;
- DELICACID® for post-installation cleaning and removing cement residues from acid-resistant surfaces;
- METAL-STRIP for removing the upper layers of maintenance waxes and metallised floor finishes;
- MICRONET® for intensive cleaning of natural stone and cement-based agglomerates;
- STRIP RESIL for wax removal and intensive cleaning of resilient floors;
- PULIBRILL® for intensive cleaning of wood and parquet floors.

After use, wash the disc thoroughly with clean water, allow it to dry completely and store it in a dry place.

PRECAUTIONS:

- Always check that the disc is suitable for the floor surface before use, especially on delicate or treated finishes.
- Use the disc only with compatible single-disc machines or scrubber dryers.
- After use, wash the disc with clean water and allow it to dry completely before storing it.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the

types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

PACKAGING:

- Single disc – pack of 1 (330 mm or 432 mm version).

YIELD:

Approximately 25–70 m² per disc, depending on the roughness of the floor surface.

TECHNICAL DATA:

- Material: non-woven synthetic fibres with mineral abrasive.
- Colour: blue.
- Abrasion level: light abrasion.
- Available sizes: 330 mm (13?) and 432 mm (17?).
- Recommended operating speed: 150–300 rpm.
- Compatible machines: single-disc machines and scrubber dryers.
- Chemical resistance: highly resistant to acidic and alkaline detergents.
- Reusable: yes.

STORAGE:

Store the disc in a clean, dry place away from moisture and heat sources. After each use, wash it thoroughly, allow it to dry completely and store it flat to preserve its operating performance.
