

BROWN BUFFER PAD | Very Abrasive

HIGH-ABRASION BUFFER PAD FOR SURFACE RESTORATION AND WAX REMOVAL ON RESISTANT SURFACES

User guide

DESCRIPTION:

BROWN BUFFER PAD is a high-abrasion synthetic fiber pad designed for deep cleaning, wax removal and restoration of terracotta, porcelain stoneware, natural stone and non-polished cement-based surfaces. Resistant to chemical products, it is washable, reusable and ideal for enhancing the effectiveness of cleaners during extraordinary cleaning operations.

FIELDS OF APPLICATION:

Ideal for:

- terracotta and terracotta tiles
- porcelain stoneware
- natural stone
- non-polished cement-based surfaces
- surfaces affected by construction dirt and post-installation residues
- surfaces requiring restoration or wax removal

CHARACTERISTICS:

BROWN BUFFER PAD is a high-abrasion synthetic fiber pad designed to support deep cleaning, wax removal and surface restoration. In particular:

- helps remove construction residues, encrustations and persistent dirt from resistant surfaces;
- enhances the effectiveness of cleaners during extraordinary cleaning and restoration operations;
- facilitates the removal of old treatments and surface build-up from non-polished materials;
- is ideal for post-installation cleaning and wax removal on terracotta, porcelain stoneware, natural stone and cement-based surfaces;
- helps prepare surfaces for subsequent protective treatments;
- can be used on different materials depending on the cleaner selected.

Made from chemical-resistant synthetic fibers, it is washable, reusable and maintains its performance over time.

INSTRUCTIONS FOR USE:

Use the BROWN BUFFER PAD together with Marbec products according to the type of surface and the level of encrustation to be removed:

- Apply the appropriate cleaner to the surface to be treated;
- Allow the product to act for the time specified in its technical data sheet;
- Work the surface with the pad using a uniform manual action;
- Scrub the surface to help remove encrustations, construction residues, old treatments and persistent contamination;
- Adjust the pressure according to the resistance of the material and the level of dirt present;
- Rinse thoroughly or remove residues according to the instructions of the cleaner used.

If particularly resistant encrustations or persistent build-ups are present, increase the contact time of the cleaner and repeat the operation until the desired result is achieved.

After use, wash the pad with water to maintain its effectiveness and allow reuse.

Use the BROWN BUFFER PAD together with Marbec products according to your deep cleaning, wax removal and restoration needs:

- For post-installation and post-construction deep cleaning of heavily encrusted porcelain stoneware, use POWER DET®

- For post-installation deep cleaning and restoration of terracotta surfaces, use VIACEM®;
- For post-construction deep cleaning of natural stone and non-polished cement-based surfaces, use DELICACID®;
- For the removal of rust stains and yellowing from natural stone materials, use ACIDO HP4;
- For wax removal and restoration of terracotta, natural stone and cement-based surfaces, use SGRISER®;
- For intensive degreasing of vertical surfaces affected by smog and atmospheric pollution, use PULITORE FC;
- For the removal of algae, lichens, mould and biological deposits from exterior surfaces, use ALGANET®

Apply with a uniform manual action until the desired level of cleanliness is achieved. On delicate or abrasion-sensitive surfaces, always perform a preliminary test on an inconspicuous area.

PRECAUTIONS:

Use only on surfaces compatible with a high abrasive action.

- Always perform a preliminary test on a small hidden area before use.
- Do not use on polished, honed, delicate or scratch-sensitive surfaces.
- Adjust the pressure applied according to the material being treated and the level of dirt present.
- Use in combination with the specific cleaners recommended for the surface being treated.
- After use, wash the pad thoroughly with water to preserve its performance and allow reuse.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

PACKAGING:

- Single pad – pack of 1 piece

YIELD:

Estimated coverage: 20–50 m² depending on the surface roughness.

TECHNICAL DATA:

- Dimensions: 250 × 115 × 25 mm.
- Colour: brown.
- Action: high abrasion.
- Material: synthetic fibers resistant to acidic and alkaline chemicals.
- Maintenance: washable with water and reusable.

STORAGE:

Store in a clean, dry place away from heat sources and direct exposure to weather conditions.
