

# SOFT MICROFIBER CLOTH | MARBEC

SOFT MICROFIBER CLOTH FOR GENTLE CLEANING OF WASHABLE SURFACES

## User guide

### DESCRIPTION:

SOFT MICROFIBER CLOTH is a professional cloth designed for cleaning glass, mirrors, stainless steel, plastic, chrome surfaces, ceramic, and enamel. Thanks to its soft, non-abrasive structure, it removes dirt, dust, and fingerprints without scratching or leaving residues. It is suitable for routine cleaning of delicate surfaces in both domestic and professional environments. The cloth is tear-resistant, washable, and reusable, maintaining its effectiveness and softness over time.

### FIELDS OF APPLICATION:

The SOFT MICROFIBER CLOTH is suitable for cleaning delicate and glossy washable surfaces in both domestic and professional environments.

It is particularly recommended for:

- stainless steel (hoods, sinks, cooktops, appliances)
- chrome surfaces (faucets, bathroom fittings)
- ceramic and enamel surfaces
- glass, mirrors, and glazed surfaces
- plastic and synthetic materials
- kitchen, bathroom, and multi-purpose areas

Thanks to its soft, non-abrasive microfiber structure, it is ideal in all situations where effective, gentle, and scratch-free cleaning is required on sensitive surfaces.

### CHARACTERISTICS:

The SOFT MICROFIBER CLOTH delivers high cleaning performance thanks to its microfiber structure, which captures and holds dirt, dust, and fingerprints.

It allows you to:

- clean delicate surfaces without scratching
- remove dirt and residues without leaving lint
- achieve uniform and visibly clean surfaces
- reduce the use of detergents thanks to the mechanical action of microfiber
- ensure good resistance to wear and tearing

Its soft and absorbent structure ensures effective daily cleaning while maintaining consistent performance over time.

### INSTRUCTIONS FOR USE:

Use the SOFT MICROFIBER CLOTH dry or slightly damp to clean washable surfaces such as glass, mirrors, stainless steel, plastic, ceramic, and enamel. Wipe with light and even movements until dirt, dust, and fingerprints are completely removed.

For best results on glossy and reflective surfaces, rinse the cloth frequently during use and wring it out thoroughly. For more stubborn dirt, use the cloth together with a suitable cleaner to improve cleaning performance.

After use, wash the cloth with water or in a washing machine and allow it to dry. The cloth is reusable many times and maintains its cleaning performance, softness, and durability over time.

### PRECAUTIONS:

Use the SOFT MICROFIBER CLOTH only on the recommended surfaces. For particularly delicate or untested

materials, it is advisable to carry out a preliminary test on a hidden area.

Avoid using the cloth with highly abrasive products or on rough surfaces, as this may compromise the integrity of the microfiber and reduce its effectiveness.

After use, wash the cloth without fabric softeners or bleach, as these may reduce its absorbency and cleaning performance over time.

#### NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

#### WARNINGS:

#### PACKAGING:

- Soft microfiber cloth – pack of 1 piece (random color)

#### YIELD:

The SOFT MICROFIBER CLOTH is reusable multiple times and maintains its cleaning performance and absorbency over time when properly washed after use.

#### TECHNICAL DATA:

- Material: high-density soft microfiber
- Dimensions: 40x40 cm
- Structure: non-abrasive, suitable for delicate surfaces
- Edge: reinforced, tear-resistant
- Use: dry or slightly damp cleaning
- Reusable: yes, machine washable
- Color: random

#### STORAGE:

Store in a clean, dry place, protected from dust and contaminants. After washing, allow the cloth to dry completely before storing.
