

PULI FUGHE

WHITENING STAIN-REMOVING CLEANER FOR BLACKENED GROUT LINES IN FLOORS AND WALL COVERINGS

User guide

DESCRIPTION:

PULI FUGHE is an alkaline degreasing and whitening cleaning solution formulated for the deep cleaning of blackened cementitious or synthetic grout lines in ceramic floors and wall coverings. It is suitable for removing dirt, grease, food stains and dark deposits from porcelain stoneware, single-fired and double-fired tiles, klinker, porcelain and glass mosaics.

FIELDS OF APPLICATION:

Suitable for the deep degreasing cleaning of cementitious or synthetic grout lines on:

- porcelain stoneware
- single-fired and double-fired tiles
- porcelain
- glass mosaics
- klinker
- ceramic floors and wall coverings

CHARACTERISTICS:

PULI FUGHE is a degreasing and whitening cleaner specifically formulated for the deep cleaning of cementitious or synthetic grout lines in ceramic floors and wall coverings. In particular:

- deeply cleans blackened grout lines by removing dirt accumulated over time;
- effectively removes grease, food stains and inorganic dirt caused by foot traffic;
- helps restore the original appearance of grout lines in porcelain stoneware, single-fired and double-fired tiles, porcelain, glass mosaics and klinker;
- does not damage ceramic tiles;
- contains neither acids nor bleach.

INSTRUCTIONS FOR USE:

The product is ready to use. For correct application:

- Spray the product onto the surface to be cleaned or degreased.
- Leave it to act for a few minutes.
- Scrub the grout lines using the EASYCLEAN 900.054 Grout Cleaning Brush or a nylon brush.
- Rinse thoroughly with warm water.

In the presence of particularly stubborn dirt or persistent darkening, increase the contact time before scrubbing.

PRECAUTIONS:

- Do not apply on wood.
- Do not use on absorbent materials treated with wax, such as terracotta.
- Do not apply on linoleum or synthetic materials.
- Avoid contact with painted surfaces and anodized aluminium.
- The product may dull methacrylate surfaces. Use caution near bathtubs made of this material.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNING: DANGER

Hazard statements: Causes severe skin burns and eye damage.

Precautionary statements: Do not breathe dust / fume / gas / mist / vapours / spray. – IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. – IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower]. – Wear protective gloves/ protective clothing / eye protection / face protection. – Immediately call a POISON CENTER / doctor / . . . – IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

Contains: POTASSIUM HYDROXIDE, ETHANOLAMINE

Ingredients in accordance with Regulation (EC) No 648/2004:
Non-ionic surfactants <5%, anionic surfactants <5%, phosphates<5%

UFI: ADA0-6014-400F-QFAG

Rev10-Ver12022025

PACKAGING:

- 750 ml PE spray bottle – box of 6 pieces
- 5 L PE canister – box of 4 pieces

YIELD:

Product coverage depends on the level of grout soiling, the amount of product applied and the contact time required for cleaning.

With one 750 ml bottle, the following approximate coverage can be achieved:

- Routine cleaning of lightly soiled grout lines
For grout lines maintained regularly, one bottle can treat approximately 30–37 m² of surface.
- Cleaning grout lines with medium dirt build-up
In the presence of widespread darkening, foot traffic dirt and non-layered greasy residues, 750 ml allows the treatment of approximately 20–30 m².
- Heavily blackened grout lines or stubborn dirt
When dirt has accumulated over time, it may be necessary to increase both the contact time and the amount of product applied, resulting in reduced overall coverage.

Regular grout maintenance helps improve product coverage and makes future cleaning operations easier.

TECHNICAL DATA:

- Physical state: colourless liquid
- Specific gravity (g/cm³): 1,06
- pH (20 °C) of the pure product: 12
- Flame point (ASTM): non-flammable
- Solubility in water: soluble in water
- Odour: characteristic

STORAGE:

Keep the product tightly closed at temperatures between 0 °C and +30 °C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
