

PULIFORNO®

POWERFUL DEGREASER AND DESCALING CLEANER FOR KITCHEN OVENS AND BARBECUES

User guide

DESCRIPTION:

PULIFORNO® is a heavy-duty alkaline gel cleaner designed for intensive cleaning on ovens, glass panels, barbecues, pots and baking dishes affected by baked-on grease, carbon deposits and soot-like residue. Its thick gel texture spreads easily, clings to vertical surfaces and provides extended contact time to help break down even the most stubborn buildup.

FIELDS OF APPLICATION:

Recommended for intensive degreasing and descaling cleaning of:

- kitchen ovens
- oven glass doors
- barbecues
- grill grates
- heavily encrusted pots and baking dishes affected by baked-on grease, carbon residue and soot-like deposits

CHARACTERISTICS:

PULIFORNO® is a heavy-duty alkaline gel cleaner designed for intensive cleaning of heavily soiled kitchen ovens, oven glass, barbecues, pots and baking dishes. In particular, it:

- effectively cleans, degreases and removes stubborn buildup such as greasy deposits, black crusts, carbon residue and soot-like dirt;
- works deep into the dirt and makes removal easier with controlled mechanical scrubbing;
- features a solvent-free, odourless and biodegradable formula;
- thanks to its gel consistency, it is easy to apply even on vertical surfaces;
- provides long-lasting degreasing power and can be reapplied several times until the surface is fully clean, without damaging compatible materials;
- rinses off easily and does not leave unpleasant odours after cleaning;
- if a slight white film remains, a quick rinse with white vinegar or citric acid is enough to finish the job.

Do not use on microwave ovens, uncoated aluminium mini ovens or aluminium pans.

INSTRUCTIONS FOR USE:

Ready to use. Apply undiluted.
Wear [protective gloves](#) and avoid contact with skin and eyes.

Apply PULIFORNO® directly onto the surface using paper towels or a plastic-fibre brush, spreading the gel evenly.

Moderately soiled surfaces

- leave on for 30–60 minutes
- scrub with an [oven scrubbing pad](#) or a [rough kitchen sponge](#), depending on the residue
- remove the product with absorbent paper
- rinse thoroughly with plenty of water
- repeat if necessary

Heavily encrusted surfaces with black crusts

- leave on for 6–12 hours
- if a light white film forms, apply SANI-KAL BIO and scrub with an oven pad or a rough sponge
- remove the product with absorbent paper
- rinse thoroughly with plenty of water
- repeat if necessary

For extremely stubborn buildup, increase the contact time and repeat the treatment until the surface is completely clean.

PRECAUTIONS:

During application, wear protective gloves and avoid contact with skin and eyes.

Do not use on:

- microwave ovens
- uncoated or unenamelled aluminium mini ovens
- unprotected aluminium pans or surfaces

NOTES:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests to the fields of use, to the types of materials present and to the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products. Rev6-Ver280122

WARNINGS:

WARNINGS: DANGER

Hazard statements: Causes severe skin burns and eye damage.

Precautionary statements: Wear protective gloves / clothing and protect eyes / face – IF SWALLOWED: Call a POISON CENTER / doctor. – IN CASE OF CONTACT WITH SKIN (or hair): immediately remove all contaminated clothing. Rinse the skin / take a shower. – IN CASE OF CONTACT WITH THE EYES: rinse thoroughly for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.

Contains: Sodium hydroxide

Ingredients compliant with Regulation (EC) No. 648/2004:
Sodium hydroxide, non-ionic surfactants <5%

UFI: 3Q60-E0C1-Y005-8S8Q

Rev6-Ver280122

PACKAGING:

- 1 kg PE Jar – box of 6 pcs
- 1 kg PE Jar + Black Oven Buffer Pad

YIELD:

Product coverage depends on the level of dirt, the contact time and the amount applied to the surface.

With a 1 kg pack, you can achieve approximately:

- Intensive cleaning of a domestic oven (light dirt)
If the oven is cleaned regularly and residue is not layered, 1 kg provides about 12–16 full intensive cleanings. Apply the product undiluted, leave it to work, then scrub with a suitable oven pad or abrasive sponge.
- Intensive cleaning of an oven with medium dirt
With widespread cooked-on grease and carbon residue that is not too thick, 1 kg allows about 8–11 full intensive cleanings.
- Heavy or strongly carbonised dirt (black crusts)
When dealing with very stubborn black deposits, you may need longer contact time and a second application. In these conditions, coverage may drop to around 5–7 full intensive cleanings, depending on the amount of product required.

The figures above are approximate estimates and may vary depending on oven size, treated surfaces and level of buildup.

TECHNICAL DATA:

- Physical state: gelatinous liquid
- Specific weight (g / cm³): 1.09

- pH: 14
- Flash point (ASTM): not flammable
- Solubility in water: partially soluble in water.
- Odour: odourless

STORAGE:

Keep the product tightly closed out of reach of children, in a well-ventilated and cool environment and not exposed to sunlight for a long time.

STORAGE PERIOD: The product stored in this way has a useful life of 5 years.
