

PULI ECO

MULTIPURPOSE DEGREASING CLEANER

User guide

DESCRIPTION:

PULI ECO is a multipurpose degreasing cleaning solution formulated with rapidly biodegradable non-ionic surfactants and soil-lifting agents. It is designed for everyday cleaning of surfaces exposed to greasy dirt, including washable areas that may come into contact with food.

FIELDS OF APPLICATION:

Recommended for daily multipurpose degreasing cleaning of:

- tables and worktops
- hobs and stovetops
- fridges
- ovens, mini ovens and microwaves
- induction hobs
- food-contact surfaces

CHARACTERISTICS:

PULI ECO is a ready-to-use multipurpose degreasing cleaner designed for daily cleaning of surfaces exposed to greasy dirt, including washable areas that may come into contact with food. In particular, it:

- delivers strong degreasing action while remaining non-aggressive, making it suitable for frequent use;
- is ideal for cleaning tables, hobs, stovetops, fridges, ovens, mini ovens, microwaves, induction hobs and food-contact surfaces;
- removes grease and helps eliminate unpleasant odours from treated surfaces;
- does not leave harmful residues after application and rinsing;
- is surface-friendly and suitable for delicate materials such as aluminium, marble and wood;
- is fragrance-free and contains no caustic soda, dyes, ammonia or solvents.

INSTRUCTIONS FOR USE:

Ready-to-use product.

- Spray PULI ECO directly onto the surface to be cleaned.
- Depending on the level of dirt, leave it to work for a few seconds up to a few minutes.
- Wipe the surface with a [microfibre cloth](#) or the most suitable cleaning tool.
- Finally, rinse thoroughly with water, especially on food-contact surfaces.

For particularly stubborn dirt, increase the contact time before wiping.

PRECAUTIONS:

None.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.
Rev4-Ver180322

WARNINGS:

Ingredients in accordance with Regulation (EC) No 648/2004:
Non-ionic surfactants <5%, 1,2-benzisothiazol-3(2H)-one, sodium pyrrithione.

PACKAGING:

- 750 ml PE spray bottle – boxes of 6 units
- 5 L PE canister – boxes of 4 units

YIELD:

Product coverage depends on the level of dirt, the contact time and the amount applied to the surface.

With a 750 ml bottle, you can expect approximately:

- Daily cleaning and routine maintenance (light dirt)
On regularly cleaned surfaces (tables, worktops, hobs and kitchen areas with fresh dirt), one bottle provides around 60–90 full cleanings, using a few sprays and wiping with a microfibre cloth.
- Cleaning kitchen surfaces with medium dirt
With more visible greasy dirt (streaks, persistent fingerprints and light cooking residues on stovetops and work areas), 750 ml provides around 35–55 full cleanings, leaving the product to work for a few minutes before wiping.
- More intensive cleaning on very greasy areas (stubborn dirt)
For tougher, more stuck-on dirt (areas near burners, repeated cooking splashes, heavier grease and lingering odours), coverage may decrease and one bottle provides around 20–35 full cleanings, depending on the required contact time and the amount used.
- Very heavy or layered dirt
If dirt is particularly thick or built up, you may need more product and longer contact time, which will reduce the total number of applications.

Regular preventive use helps improve overall coverage and makes future cleaning easier.

TECHNICAL DATA:

- Physical state: colourless liquid
- Specific gravity (g/cm³): 1,015
- pH (20°C) pure: 10-11
- Flame point (ASTM): non-flammable
- Solubility in water: soluble
- Fragrance: Fragrance-free

STORAGE:

Keep the product tightly closed at temperatures between 0 °C and +30 °C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
