

PULI TUTTO

CONCENTRATED UNIVERSAL DEGREASER FOR HARD SURFACES

User guide

DESCRIPTION:

Concentrated cleaning solution based on water, glycols, alcohols, amines, dispersing agents, sequestering agents and surfactants.

FIELDS OF APPLICATION:

PULI TUTTO is suitable for the routine and deep cleaning of absorbent and non-absorbent hard surfaces. It can be used on natural stone, terracotta, concrete, treated wood, ceramic materials, metal, glass and synthetic surfaces. Adjust the dilution according to the type of dirt and the surface to be cleaned.

CHARACTERISTICS:

PULI TUTTO is a concentrated sanitising cleaner with a wide range of uses, depending on its dilution in water. It is ideal for the routine and deep cleaning of absorbent and non-absorbent hard surfaces, including terracotta, natural stone, concrete, wood, ceramic materials, metal, glass and synthetic surfaces.

PULI TUTTO:

- has a low-foaming formula;
- when highly diluted, it is ideal for everyday cleaning of household floors and surfaces such as furniture, window and door frames, sanitary ware and glass;
- at higher concentrations, it is suitable for degreasing heavily soiled surfaces;
- when used neat or diluted with an equal amount of water, it is ideal for intensive deep cleaning and removing old, darkened wax treatments;
- does not leave streaks on the material and leaves a pleasant fragrance indoors.

INSTRUCTIONS FOR USE:

The recommended concentration depends on the type of dirt to be removed.

Dilution ratios (use the measuring cap provided):

Use PULI TUTTO neat or dilute 1 part product with 1 part water: for intensive deep cleaning of old wax treatments darkened by accumulated dirt and for removing excess maintenance wax without completely stripping the underlying protective treatment. Spread PULI TUTTO over the floor, leave it to work for a few minutes and then scrub the surface with a medium-abrasion pad. Remove the residue and rinse with water.

- Dilute 20 ml of PULI TUTTO in 5 litres of water: for the everyday cleaning of treated and untreated floor surfaces, including terracotta, natural stone, ceramic surfaces, clinker, wood, washable walls, plastic surfaces, lacquered and painted surfaces such as tables, furniture, window and door frames and vehicle interiors, as well as linoleum, sanitary ware and glass.
- Dilute 30–50 ml of PULI TUTTO in 1 litre of water: for the periodic cleaning of untreated hard surfaces with normal levels of dirt.
- Dilute 1 part PULI TUTTO with 3–5 parts water: for cleaning tasks that require powerful degreasing action, such as heavily soiled surfaces, vehicle engines, work surfaces, hobs, mechanical parts, marker stains and wooden floors.

PRECAUTIONS:

- None.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNINGS: ATTENTION

Hazard statements: Causes serious eye irritation. – Causes skin irritation.

Precautionary statements: Wear protective gloves/protective clothing/eye protection/face protection/hearing protection/... – If eye irritation persists: Get medical advice/ attention. – IF ON SKIN: Wash with plenty of water/... – If skin irritation occurs: Get medical advice/attention. – IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Ingredients compliant with Regulation (EC) No. 648/2004:
Non-ionic surfactants <5%, perfume (D-Limonene, Linalool, Hexil cinnamal).

UFI: RH00-Y0NF-W00J-M6A2

Rev8-08062023

PACKAGING:

- 1-litre PE bottle – box of 6 units

YIELD:

Coverage depends on the dilution used.

20 ml of PULI TUTTO in 5 litres of water = maximum coverage of 100 m²

TECHNICAL DATA:

- Physical state: liquid
- Colour: pink
- Odour: characteristic
- Flammability: non-flammable
- pH: 11
- Density and/or relative density: 1.004 kg/l

STORAGE:

Keep the container tightly closed and store at temperatures between 0°C and +30°C. Avoid prolonged exposure to sunlight. When stored under these conditions, the product has a shelf life of 2 years.
