

# INDOOR WAXED GLOSS TERRACOTTA AND STONE MAINTENANCE KIT

## INDOOR GLOSS TERRACOTTA AND STONE MAINTENANCE KIT

### User guide

#### DESCRIPTION:

The INDOOR WAXED GLOSS TERRACOTTA AND STONE MAINTENANCE KIT is a complete system for cleaning and maintaining absorbent indoor surfaces made of terracotta, natural stone and cement-based agglomerates with a gloss-waxed finish. It supports routine and periodic cleaning while helping preserve the aesthetic and protective properties of the original treatment over time.

#### FIELDS OF APPLICATION:

Suitable for maintaining previously treated, absorbent indoor surfaces with a gloss-waxed finish, including:

- terracotta floors
- absorbent natural stone floors
- cement-based agglomerate floors

#### CHARACTERISTICS:

The INDOOR WAXED GLOSS TERRACOTTA AND STONE MAINTENANCE KIT is a complete system for cleaning and maintaining previously treated, absorbent indoor surfaces with a gloss-waxed finish. The combined action of the products supports daily, periodic and deep cleaning while renewing the surface protection affected by normal wear. As a result, it helps preserve the aesthetic and protective properties of the original treatment over time.

In particular:

- FLORA cleans and degreases terracotta, natural stone and cement-based agglomerates without damaging stone materials or wax treatments;
- REFIX LUCIDO renews the surface protection and preserves the aesthetic and protective properties of the original treatment, while revitalising and maintaining the glossy appearance of the finish;
- PULI-SCRUB helps collect dirt and improves the cleaning action on rough, microporous or irregularly textured surfaces;
- SMART-FUR collects dust and dirt, absorbs the cleaning solution and is suitable for distributing waxes and maintenance products evenly;
- the professional handle and swivel mop holder with Velcro system complete the cleaning and maintenance system, making it easier to use the mops on the surfaces being treated.

#### INSTRUCTIONS FOR USE:

Use the products in the kit according to the type of maintenance required.

- For daily cleaning: dilute 10–20 ml of FLORA in 5 litres of water and apply as a normal cleaner with PULI-SCRUB.
- For periodic cleaning: dilute 30–50 ml of FLORA in 5 litres of water and apply as a normal cleaner with PULI-SCRUB.
- For deep cleaning: dilute 250–500 ml of FLORA in 1 litre of water, spread the solution over the floor and leave it to work for a few minutes. Scrub the surface with PULI-SCRUB, then rinse thoroughly with PULI-SCRUB and clean water.
- For maintenance of the gloss-waxed finish: apply REFIX LUCIDO to clean, dry surfaces. Shake well before use, apply a small amount of product to the surface and distribute it evenly with SMART-FUR. Leave the surface to dry without walking on it.

Frequency of use of REFIX LUCIDO: every 4–6 months on heavily trafficked surfaces subject to high wear; every 12 months on lightly trafficked surfaces.

N.B. For detailed application instructions, drying times, coverage and further directions for use, please refer to the technical data sheets of the individual products.

#### PRECAUTIONS:

Use the kit exclusively for cleaning and maintaining surfaces that are compatible with the products included in the system.

- before application, check that the products are suitable for the material and existing treatment
- apply REFIX LUCIDO only to clean, dry surfaces
- do not walk on the surface while REFIX LUCIDO is drying
- to preserve the gloss-waxed finish, avoid strongly alkaline cleaners, ammonia-based cleaners and solvents

N.B. For specific precautions and safety information, please refer to the technical data sheets of the individual products.

#### NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

#### WARNINGS:

Before purchasing the products, we recommend **reading the warnings and risks** provided on the relevant product pages.

- [Go to the FLORA product page](#)
- [Go to the REFIX LUCIDO product page](#)

#### PACKAGING:

- n. 1 5-litre container of FLORA
- n. 1 5-litre container of REFIX LUCIDO
- n. 1 EASYCLEAN 700112 FIXED ALUMINIUM HANDLE 140 CM
- n. 1 ARTICULATED MOP FRAME WITH VELCRO SYSTEM | FILMOP, 40 cm
- n. 2 PULI-SCRUB MICROFIBRE MOPS WITH VELCRO BACKING | FILMOP
- n. 2 SMART-FUR MICROFIBRE MOPS WITH VELCRO BACKING | FILMOP

#### YIELD:

For detailed information on approximate coverage, the number of treatments possible and conditions of use, refer to the technical data sheets for the individual products included in the kit.

#### TECHNICAL DATA:

For detailed technical data on each cleaning product and accessory included in the kit, refer to the relevant technical data sheets for the individual products.

#### STORAGE:

For detailed storage information, refer to the technical data sheets for the individual products included in the kit.
