

# PORCELAIN TILE CLEANING KIT

COMPLETE KIT FOR INTENSIVE CLEANING AND MAINTENANCE OF PORCELAIN TILES

## User guide

### DESCRIPTION:

The PORCELAIN TILE CLEANING KIT is a complete system for post-installation cleaning, intensive stain-removal cleaning, protective anti-stain treatment, and routine maintenance of porcelain tiles. It is suitable for matt, polished, lapped and structured porcelain tile surfaces, in both residential and professional environments. The combined action of the detergents and the included technical accessory helps remove installation residues, greasy films, limescale deposits, streaks and marks visible in reflected light, helping restore the uniformity of the surface and keep it cleaner and easier to maintain over time.

### FIELDS OF APPLICATION:

Suitable for post-installation cleaning, intensive stain-removal cleaning, protective anti-stain treatment and routine maintenance of:

- matt porcelain tiles
- polished porcelain tiles
- lapped porcelain tiles
- structured or anti-slip porcelain tiles
- porcelain tile floors
- porcelain tile wall coverings
- surfaces with streaks, films and marks visible in reflected light
- surfaces contaminated by installation residues, greasy dirt and limescale deposits

### CHARACTERISTICS:

The PORCELAIN TILE CLEANING KIT is a cleaning system designed for post-installation cleaning, intensive stain-removal cleaning, protective anti-stain treatment and routine maintenance of porcelain tile surfaces. The combined action of the products helps tackle the main types of surface contamination, including installation residues, greasy films, limescale deposits, streaks and marks visible in reflected light, helping restore and preserve the original appearance of the material over time.

Specifically:

- POWER DET® provides a stain-removing, degreasing and descaling action for post-installation and intensive cleaning of porcelain tiles, helping remove construction residues, films, streaks and persistent surface contamination;
- GRES LINDO® provides a degreasing cleaning action for routine and periodic maintenance, helping remove greasy contamination and preserve the uniform appearance of the surface;
- GRES BRILL® provides a descaling and anti-limescale cleaning action, helping remove streaks, mineral films and dulling caused by household water deposits;
- ANTISPORCO creates an invisible anti-stain protective barrier that reduces the absorption of contaminants, makes routine cleaning easier and helps keep the surface more uniform over time;
- BLUE BUFFER PAD enhances the action of the cleaners through a controlled mechanical action, improving the removal of stubborn dirt, films, residues and surface stains.

### INSTRUCTIONS FOR USE:

Use the products included in the PORCELAIN TILE CLEANING KIT according to the type of contamination and the level of dirt present on the surface.

- For installation residues, persistent streaks and layered contamination: use POWER DET® pure or diluted according to the level of soiling, then scrub with the BLUE BUFFER PAD and rinse thoroughly.
- For the protective anti-stain treatment: apply ANTISPORCO to a perfectly clean and dry surface, distributing the product evenly.
- For routine maintenance and the removal of greasy contamination: use GRES LINDO® diluted in water according to the instructions provided in the technical data sheet.
- For routine maintenance and the removal of streaks and limescale deposits: use GRES BRILL® diluted in water according to the instructions provided in the technical data sheet.
- Use the BLUE BUFFER PAD to support the action of the cleaners during intensive cleaning and stain-removal operations.

NOTE: For detailed application methods, dilution ratios, contact times and compatible surfaces, refer to the technical data sheets of the individual products.

## PRECAUTIONS:

During the use of the products included in the kit, it is recommended to follow the instructions provided in the technical data sheets of each product and always carry out a preliminary test on a small, inconspicuous area.

Do not use POWER DET® on:

- wood
- untreated highly absorbent terracotta
- materials that are not resistant to solvents

Do not use POWER DET® and GRES BRILL® on:

- polished calcareous marble
- polished travertine
- black slate
- polished terrazzo surfaces
- materials sensitive to acidic substances

Do not use GRES LINDO® on:

- surfaces treated with polymer waxes
- materials that are not resistant to water and moisture

Use the BLUE BUFFER PAD only on surfaces compatible with light abrasive action, avoiding excessive pressure on delicate or easily scratched materials.

## NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

## WARNINGS:

Before purchasing any product, please **read the warnings and safety information** available on the relevant product pages.

## PACKAGING:

### SMALL PORCELAIN TILE CLEANING KIT

- No. 1 x 1-litre PE bottle of POWER DET®
- No. 1 x 1-litre PE bottle of GRES LINDO®
- No. 1 x 1-litre PE bottle of GRES BRILL®
- No. 1 x 750 ml PE spray bottle of ANTISPORCO
- No. 1 BLUE BUFFER PAD

### LARGE PORCELAIN TILE CLEANING KIT

- No. 1 x 5-litre PE container of POWER DET®
- No. 1 x 5-litre PE container of GRES LINDO®
- No. 1 x 5-litre PE container of GRES BRILL®
- No. 2 x 750 ml spray bottles of ANTISPORCO
- No. 2 BLUE BUFFER PADS

## YIELD:

For detailed information on indicative coverage, number of achievable treatments and conditions of use, please refer to the technical data sheets of the individual products included in the kit.

## TECHNICAL DATA:

For detailed technical data on each detergent and accessory included in the kit, please refer to the respective technical data sheets of the individual products.

## STORAGE:

For detailed information regarding storage conditions, please refer to the technical data sheets of the individual products included in the kit.
