

KIT RECUPERA MARMO

COMPLETE KIT FOR THE RECOVERY AND REMOVAL OF MICROGRAPHS FROM MARBLES AND STONES

User guide

DESCRIPTION:

Diamond pads and specific products for polishing and protecting marble, stone and grit surfaces.

FIELDS OF APPLICATION:

On marble, stone and terrazzo floors or walls.

CHARACTERISTICS:

KIT RECUPERA MARMO is ideal for the re-polishing of marble and polished terrazzo (grits, palladian, etc.).

KIT RECUPERA MARMO:

- is indicated for the re-polishing and removal of stains due to wear, limestone crusts or acidic substances and scratches on stairs, walls and bathroom tops strongly damaged.
- Use with a drill or screwdriver.
- With the Kit Recuperera Marmo 75MM you can do up to about 3/4 m².
- With the Kit Recuperera Marmo 125MM you can do up to about 8/10 m².
- Always use water as lubricant together with MARBEC DIAM DISC, MARBEC DIAM PAD and KW-STAR.
- When not using an adjustable speed drill, adjust the pressure accordingly.
- Use clean water at every step.
- Repeat the process if necessary.
- It is necessary to apply pressure on each step when working on marble or terrazzo.
- Do not use on granite, quartz or resin tops.

INSTRUCTIONS FOR USE:

1° Passage, RED DIAM DISC MARBEC:

– Roughing –

This is the most important step of all. If the first step is not performed well the following steps will not have an optimal result.

- The surface should be cleaned before starting (remove any previous film-forming treatments such as waxes or resins).
- Add water and slowly drill the RED DIAM DISC MARBEC.
- It is necessary to apply the product with the drill making small uniform circular movements on the affected surface until the water does not change color and a mush forms.
- Then remove the dirty water.
- You will need to repeat sanding depending on the state of the surface.

2° Passage, ORANGE DIAM DISC MARBEC:

– Sanding –

With this second step we will continue to smooth the surface more and more finely. Repeat the steps of the first application using the ORANGE DIAM DISC MARBEC.

3° Passage, YELLOW DIAM DISC MARBEC:

– Pre-polishing (2 TIMES) –

With this third step we will already get some shine. Add water and repeat the first application using the YELLOW DIAMOND DISC MARBEC. Clean the surface and let it dry. Repeat the process again and remove the dirty water.

4° Passage, BLUE DIAM DISC MARBEC:

– Polishing (2 times) –

Proceed to repeat step n. 3 using the BLUE DIAM DISC MARBEC. With this step we will get the shining. The color of the water will no longer be so cloudy.

5° Passage, GREEN DIAM DISC MARBEC:
– Final polishing –

Repeat step n.4 using the GREEN DIAMOND DISC MARBEC. The surface is polished.

6° Passage, GREEN PAD DIAM MARBEC + KW-STAR:
– Crystallization –

With this fourth step we will crystallize and polish the surface.

- Add small amounts of crystallizing powder of KW-STAR and slightly wet with water to form a paste, then slowly pass the GREEN DIAM PAD MARBEC with the drill.
- It is necessary to apply the product with the drill making small uniform circular movements on the affected surface until the water does not change color and a mush forms. Then remove the dirty water.
- You will need to repeat polishing depending on the state of the surface.

7° Passage, MICROFIBER CLOTH + MARMOLUX :
– Protective action and maintenance –

- Add small amounts of MARMOLUX and use the MICROFIBER CLOTH to polish the surface.
- It is advisable to apply MARMOLUX for routine maintenance once every 6 months or as required.

PRECAUTIONS:

NOTES:

WARNINGS:

Before purchasing products, it is recommended to [read the warnings and risks](#) on the relevant product pages.

PACKAGING:

- KIT RECUPERA MARMO 75MM ;
- KIT RECUPERA MARMO 125MM:

YIELD:

- With the Kit Recupera Marmo 75MM you can do up to about 3/4 m².
- With the Kit Recupera Marmo 125MM you can do up to about 8/10 m².
