

ARTICULATED MOP FRAME WITH VELCRO SYSTEM | FILMOP

ARTICULATED ALUMINIUM MOP FRAME WITH VELCRO SYSTEM

User guide

DESCRIPTION:

The articulated aluminium mop frame with Velcro system is a professional cleaning frame featuring a 360° swivel joint and Lock System, designed to support Velcro-backed mop pads and cleaning cloths for cleaning floors, wall coverings and vertical surfaces.

FIELDS OF APPLICATION:

Suitable for use in domestic, commercial and professional environments, it is ideal for cleaning a wide range of washable surfaces.

- Porcelain stoneware and ceramic.
- Terracotta, marble and natural stone.
- Concrete and cement-based surfaces.
- Resilient flooring including PVC, LVT, SPC, rubber and linoleum.
- Washable walls, doors and wall coverings.

CHARACTERISTICS:

The articulated aluminium frame with Velcro system is designed to support routine and deep cleaning operations using Velcro-backed mop pads and cleaning cloths. In particular, it:

- keeps the cleaning accessory firmly in contact with the surface for consistent and effective cleaning;
- provides excellent glide, reducing operator effort during cleaning;
- allows easy access to corners, edges and difficult-to-reach areas thanks to the 360° swivel joint;
- enables the swivel joint to be locked using the Lock System, improving stability when cleaning vertical surfaces;
- is compatible with Velcro-backed mop pads and cleaning cloths, allowing the cleaning system to be adapted to different applications;
- can be used on floors, wall coverings and vertical surfaces in domestic, commercial and professional environments.

Manufactured from aluminium and high-performance engineering materials, it is lightweight, durable and designed to deliver long-lasting performance, even under frequent professional use.

INSTRUCTIONS FOR USE:

- Fit the frame onto a compatible handle with a diameter of 20–24 mm and attach the Velcro-backed mop pad or cleaning cloth, ensuring it is firmly secured to the Velcro strips.
- Clean using smooth, even movements across the surface. When cleaning walls and other vertical surfaces, activate the Lock System with a simple foot press to lock the side movement of the swivel joint and improve frame stability.
- After use, remove the cleaning accessory, wash it according to its care instructions and store the frame clean and dry.

PRECAUTIONS:

Always ensure that the mop pad or cleaning cloth is compatible with the frame's Velcro fastening system before use.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:
