

# GUARD

## STAIN PROTECTION FOR LOW ABSORBENT COMPACT STONES

### User guide

#### DESCRIPTION:

Aqueous solution of inorganic salts.

#### FIELDS OF APPLICATION:

For the anti-stain treatment of compact and poorly absorbing stones: granites, marbles, sanded or polished terrazzo placed inside and outside.

#### CHARACTERISTICS:

**GUARD** is a protective oil-repellent specific for compact and poorly absorbing stone materials: marble, granite, sanded and polished terrazzo placed indoors and outdoors.

#### **GUARD:**

- is a protective anti-stain impregnation specific for compact stone materials with low absorption;
- forms an oil-repellent chemical barrier;
- does not form superficial films, is invisible and does not alter the appearance of the material and the color tone over time;
- has a high chemical inertia and resistance to weathering and trampling;
- is an aqueous, odourless product, without danger and specific toxicity to the user and the environment.

#### INSTRUCTIONS FOR USE:

Apply on clean, dry and untreated surface.

- Shake before use;
- Generally, a coat of product is sufficient to give the oil-repellent protection;
- Spread GUARD with spreading fleece, soft cloth or sponge wetting the surface evenly;
- Dab any excess before drying;
- In the case of dried excess on the surface, remove them by brushing a wet with GUARD cloth over the material;
- As it is dry (1 – 2 hours) apply the second coat (where necessary) proceeding as for the first;

The product dries completely in 4 -8 hours.

#### PRECAUTIONS:

- GUARD does not act as a film-forming sealing agent. Therefore, it cannot be used for waterproofing materials subjected to water depth > 10 cm (e.g. swimming pools, baths, etc.);
- does not block the rising damp from damp substrates.

#### NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

#### WARNINGS:

**Hazard statements:** Safety data sheet available on request.

Rev4-Ver150322

#### PACKAGING:

- 1 lt Plastic bottle – box 6 pieces;
- 5 lt Plastic tank – box 4 pieces.

#### YIELD:

- Approximately 1 lt / >20 m2.

#### TECHNICAL DATA:

- Physical state: white transparent liquid
- Specific gravity (g/cm3): 1,013
- pH (20°C) of the pure product: 5-6
- Flame point (ASTM): non-flammable
- Solubility in water: soluble in water.

#### STORAGE:

Keep the product tightly closed and at a temperature between 5 and 30 °C in an aerated environment, away from heat sources and not exposed to sunlight for a long time. When stored at low temperatures (<10 °F) the product can become dense, but without affecting its use or performance. The stored product has a useful life of 5 years.
