

# GRES LINDO®

## CONCENTRATED DEGREASING DETERGENT FOR PORCELAIN TILES

### User guide

#### DESCRIPTION:

Concentrated alkaline detergent solution based on inorganic salts.

#### FIELDS OF APPLICATION:

For ordinary degreasing cleaning of all porcelain tiles surfaces.

#### CHARACTERISTICS:

**GRES LINDO** is a concentrated detergent with a very low content of surfactants based on inorganic salts for porcelain tiles and microporous materials.

#### **GRES LINDO:**

- is a concentrated detergent that is used at very low concentrations in ordinary cleaning;
- eliminates all the ordinary dirt accumulated overtime on porcelain tiles surfaces, where it is necessary to carry out an easy and quick domestic cleaning action;
- cleans and keeps the surface degreased, preventing the contamination of patinas and fatty substances;
- dries quickly, without the need for rinsing in the concentration of ordinary cleaning, and does not leave halos;
- maintains the original colour of the surface and the continuous use of the product keeps the joints clean;
- can be used for manual washing or with domestic floor cleaning equipment;
- does not contain strong alkalis (caustic soda, potash, ammonia). It has low foaming.
- is recommended to use 1-2 times a month also on glossy porcelain tiles in the ordinary dilution to remove any fatty patinas due to kitchen fumes, trampling and environmental pollution as an alternative to the product GRES BRILL.

In case of floors very alonati and difficult to wash even with GRES LINDO, it is recommended to carry out a scrubbing with POWER DET, because on the surface there is a patina for incorrect or non after-installation cleaning or the presence of contaminants that are difficult to remove (e.g. waxes).

#### INSTRUCTIONS FOR USE:

- Dilute 170-250cc (a glass) of GRES LINDO in 5 liters of water: for an extraordinary degreasing and descaling cleaning or to eliminate deposits left by the use of calcareous water for domestic use.
  - Work a few square meters at a time;
  - Spread the product on the surface and let it act on the material for 4-5 minutes (the product must not dry);
  - After the contact time of the product, rub the material with a rough kitchen sponge or blue buffer;
  - Remove the product and dirt with microfibre cloths;
  - Finally, rinse everything with clean water.
- Dilute 20-50cc (about one or half coffee cup) of GRES LINDO in 5lt of water: for the ordinary degreasing cleaning of porcelain tiles surfaces.
  - It is applied like a normal detergent with a microfibre cloth. In this dilution, it is also possible to use washer-dryers. If traces of detergent remain, increase the dilution.

#### PRECAUTIONS:

- do not use on surfaces treated with polymeric waxes;
- do not use on materials that are not resistant to water and humidity (eg wood, paper).

#### NOTES:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests to the fields of use, to the types of materials present and to the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

## WARNINGS:

**Hazard statements:** safety data sheet available on request.

Ingredients compliant with Regulation (EC) No. 648/2004:

Phosphates 5%<C<15%, anionic surfactants <1%, non-ionic surfactants <1%, 1,2-benzisothiazol-3(2H)-one, Na pyrrithione. Perfumes: d-Limonene, Menthol.

UFI: 8190-20YS-700J-400F

Rev7-Ver070322

## PACKAGING:

- 1 lt Plastic bottle – box 6 pcs;
- 5lt Plastic tank – box 4 pcs.

## YIELD:

- According to the concentrations of use.

## TECHNICAL DATA:

- Physical state: light green liquid
- Odor: mint.
- Specific weight (g / cm<sup>3</sup>): 1.095.
- pH (20 ° C) of the pure product: 9.
- Flashpoint (ASTM): not flammable.
- Solubility in water: soluble in water.

## STORAGE:

Keep the product tightly closed at temperatures between 0°C and + 30°C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
