

SMACCHIO LEGNO

STAIN REMOVER FOR WOOD

User guide

DESCRIPTION:

Acid/solvent mixed-function solution with low foaming surfactants.

FIELDS OF APPLICATION:

For the extraordinary washing and renewal of the surfaces of wooden artifacts such as flooring, cladding, garden furniture, windows, etc.

CHARACTERISTICS:

SMACCHIO LEGNO is a stain remover for wooden surfaces and artifacts such as: floors, coverings, garden furniture, windows, etc.

SMACCHIO LEGNO:

- removes gray patinas of aging, algae, and mold from wood exposed to the outside, rough or with protective finishes to be restored;
- avoid the surfaces from being sanded;
- easily renews the natural appearance of aged and deteriorated wood, preparing it for the application of a new protection (paints, oils, various impregnating agents);
- can also be used as a specific tannin stain remover on wooden surfaces, both raw and treated (oiled or painted). In the case of painted surfaces, the product works only if it comes into contact with the wood fiber that is under the painted surface.

SMACCHIO LEGNO product is not a detergent for the daily cleaning of wooden and parquet surfaces, it is not a paint remover or a wax remover and it does not remove the layers of paint, impregnating agents, oils and waxes.

INSTRUCTIONS FOR USE:

- Shake before using;
- Apply the product with a brush, cloth, sponge on the surface;
- Keep the surface wet for about 20 minutes or more, depending on the patina to be removed;
- After the contact time, rub the surface with water and blue buffers or discs of medium hardness or nylon brushes;
- Spread the DETERCLEAN detergent diluted 50% in water on the material, in order to neutralize the acid action of SMACCHIO LEGNO product;
- Finally, rinse with clean water;
- Repeat the application if necessary.

PRECAUTIONS:

- always carry out a test before use;
- do not apply on too hot surfaces;
- protect vegetation from contact with the product;
- protect eyes and skin from product contact with suitable clothing.

NOTES:

Our recommendations are based on current research knowledge and are intended to give the best information to the buyer-user. However, these indications require preliminary examinations and tests of the fields of use, the types of materials present, and the various conditions of application. The user decides independently on suitability and on the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNINGS: DANGER

Hazard statements: Causes serious eye damage.

Precautionary statements: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.- Wear eye protection/face protection. – Immediately call a POISON CENTER / doctor / . . .

Contains: Oxalic acid dihydrate.

Ingredients compliant with Regulation (EC) No. 648/2004:
Non-ionic surfactants less than 5%

UFI: 7630-P01S-D00V-4SD2

Rev4-Ver170222

PACKAGING:

- 1 lt Plastic bottle 6 pcs box;
- 5 lt Plastic canister 4 pcs box.

YIELD:

Depending on the absorption of the materials:

- in the recovery of old wood: 1lt / 6 – 8 m².
- as a stain remover: 1 lt / 12 – 15 m².

TECHNICAL DATA:

- Physical state: clear colorless liquid
- Specific weight (20 ° C): 1.035
- pH (20 ° C): 1-2
- Flash point (ASTM): not flammable
- Solubility in water: water-soluble

STORAGE:

Keep the product tightly closed at temperatures between 0 ° C and + 30 ° C and not exposed to sunlight for a long time. The stored product has a useful life of 2 years.
