

ROBONETTO

CONCENTRATED CLEANER FOR ROBOTS

User guide

DESCRIPTION:

Concentrated detergent solution based on water, glycols, alcohols, anionic and non-ionic surfactants and perfume

FIELDS OF APPLICATION:

- For the ordinary cleaning of all hard surfaces (cotto, stone, cement, wood, ceramic materials, PVC, Linoleum and other synthetic surfaces) carried out with robot scrubbers.

CHARACTERISTICS:

ROBONETTO is a concentrated detergent for floor cleaning robots for the ordinary cleaning of all types of floors (cotto, stone, cement, wood, ceramic materials, porcelain tiles, PVC, linoleum and other synthetic surfaces).

ROBONETTO:

- is a highly concentrated, hypoallergenic, and eco-friendly detergent formulated to reduce the risk of allergic reactions and increase environmental sustainability compared to traditional volatile organic components (VOCs) and surfactants;
- prevents the formation of streaks and patinas without leaving residues on the surface;
- can also be used on very delicate surfaces (e.g. wood and polished marble or materials treated with waxes);
- can be used on all the most common types of scrubbing robots;
- is effective even at low concentrations of use, has a low foam, rapid evaporation, and does not leave streaks after use leaving in the rooms a delicate and fresh floral scent.

On porcelain tiles where the "use patina" (opaque halos in backlight) is already present, it is advisable to carry out an extraordinary washing with POWER DET and BLUE BUFFER before using ROBONETTO

INSTRUCTIONS FOR USE:

- Dilute 15 ml ROBONETTO of product in 500 ml of water (Use the dosing cap of the package)

In the case of very calcareous water present in the domestic water supply, it is advisable to use distilled water to avoid clogging the tank of the robot and unwanted limestone residues on the pavement (formations of patinas and streaks). Alternatively, rinse the tank regularly (e.g. weekly).

PRECAUTIONS:

- Do not exceed the mixing ratio indicated to avoid the formation of halos and unwanted streaks.

NOTES:

Our indications are based on the current knowledge of the research and are intended to give the best guidance to the buyer-user. However, such indications require preliminary examination and testing of the fields of use, the types of materials present and the various conditions of application. The user decides independently on the suitability and the field of use. MARBEC Srl assumes no responsibility for the incorrect use of its products.

WARNINGS:

WARNINGS: ATTENTION

Hazard statements: Causes serious eye irritation.

Precautionary statements: Wear eye protection/face protection; If eye irritation persists, consult a doctor; Keep out of the reach of children.

Contains: Non-ionic surfactants <5%, Anionic surfactants <5%, Perfume, Preservatives.

UFI: YT90-N06C-0000-2281

PACKAGING:

- 1 lt Plastic bottle.

YIELD:

- With 1 liter of product are made more than 30 liters of detergent solution useful to wash about 900 m² of surface.

TECHNICAL DATA:

- Physical state: clear liquid.
- Color: pink.
- Specific gravity (g/cm³): 1
- pH (20 ?? C) of the pure product: 7
- Flame point (ASTM): non-flammable.

STORAGE:

Keep the product tightly closed at temperatures between 0°C e +30°C. The product thus preserved has a useful life of 2 years.
